	32. Food properly labeled and honestly presented			42. Garbage and refuse properly disposed			50. Impoundment		
			of, facilities maintained				51. Permit Suspension		

## **Opening Comments**

A complaint investigation was conducted this date at Juice It Up-TSU.

Environmental Health and Safety (EH&S) received a complaint that a student exhibited an allergic reaction where they developed hives and numbness around their face after notifying Juice It Up-TSU of their allergies with pineapples. The complainant wanted to ensure that this does not occur to other students on campus.

At the time of the investigation, the person in charge indicated that they were aware of the allergy notification. The procedure for allergens at this location is to use a clean scoop to scoop the items specific to the drink that is ordered. EH&S observed scoops in some of the frozen fruit containers that are specific to each type of fruit.

After a discussion with the person in charge, Juice It Up- TSU will be purchasing additional scoops so they can provide one scoop for each the fruit in the freezer, In addition, they will be washing, rinsing, and sanitizing, the utensils prior to assembling a drink for allergens.

No additional follow-up is required.

It was agreed that a copy of this report will be sent to the email address on file. The person in charge was directed to call this office if the report is not received within two business days. Additional information can be found at www.ehs.fullerton.edu
